

**FOR IMMEDIATE RELEASE**

**WILD SHINERS REVEAL**

**LOCAL ECONOMIC STIMULUS PACKAGE**

**Black Light Ball Will Boost Local Economy**

The infamous local purveyors of Dionysian revelry, The Loyal Order of Wild Shiners, are out to stimulate the local economy, while at the same time hosting a darned good time. According to Genetool, Minister of Motivated Inspiration, The Wild Shiner Black Light Ball will occur on Friday, January 29 at the Chalet Suzanne airstrip and will be very stimulating, if not to the economy, at least to the senses. This public event is unlike anything Polk County experiences in a normal year, much less a recession. The secretive Lake Wales Mardi Gras Krewe exposes the Center of the Universe to attendees, a day-glo fishy world where most anything imaginable may come to fruition, except they guarantee no stock market reports will be announced.

Minister of Financial Alchemy, Cheapfool, claims that this year's ball may pull the local economy from the doldrums. The modest 15 dollar cover charge should kick off a kinetic fiduciary chain reaction that will be a combination of the domino effect, the butterfly effect, and sleight of hand, resulting in expected massive stimulation to local economic well-being. The details of how this might actually work are yet to be fleshed out, which you might notice is very similar to the situation with the massive taxpayer give-a-way bank bail-out and so-called stimulus package currently being massaged by the government and corporate elite. At least the Shiner Ball Plan promises concrete visceral rewards for the participants in its rock and roll Ponzi scheme. Furthermore, Cheapfool promises no mortgage-backed securities will be offered for sale at the ball.

And speaking of such, Whirlpool, Minister in Charge of Jagger Re-creation, will direct the rhythmic inculcations via his band, Jr. & the MDs, and when they are not ensconced in frenetic musical battle, another Shiner-infused band currently known as Station 6 will carry on the electro-melodious cacophony. Simply put, the music will not stop. Pilgrims to the Shiner Ball, which has been occurring for nigh almost a quarter century, are known to attire themselves in far-reaching and/or far-out costumery, although this is completely optional. But, it should be noted that duds that in some fashion glow under the influence of ultraviolet black lights can be highly rewarding, and a plain white tee shirt can become a thing of astounding beauty under these aforementioned lights. So don't waste too much time fussing over your costume at home, as the revelry terminates around midnight. But remember, glowing accessories may be purchased at local mercantiles, so plan ahead and keep those dollars moving through the local economy.

Likewise, refreshments need to be procured in advance at your favorite grocery and may be carted to the ball in the vessel of your choice, a cooler often works reasonably well especially if it possesses wheels that actually roll. The doors to the tent will fly open sometime shortly after 8:00 PM but it is unlikely the first chord will be struck much before 9:00PM, musicians being the intransigent night-owls that they are.

If the information provided here to some degree provides more confusion than enlightenment on the subject of the Wild Shiner Ball, inquisitive souls with adequate cyber-skills may consult [www.shinerball.com](http://www.shinerball.com) in search of more lucid testimony. And please remember, past performance is no guarantee of future productivity, but being in the moment usually produces good results.
